Quality Businesses

We invest only in companies with strong fundamentals, ethical management, and sustainable competitive advantages. Every stock is screened through rigorous research to ensure enduring quality and consistent growth potential.

Value Investing

We follow the principle of buying quality businesses at attractive valuations. A strict margin of safety guides every investment, ensuring that we protect capital while positioning for meaningful upside.

OUR STRATEGY

Sustainable wealth is built through patience, research, and the power of compounding — not speculation.

Portfolio Optimization

We maintain a focused yet diversified portfolio of high-conviction ideas. The portfolio is built gradually, reviewed periodically, and rebalanced strategically to enhance returns while controlling downside risk.

Ownership Mindset

We invest with a long-term perspective, typically over three years or more. Viewing ourselves as business owners, we stay invested through market cycles and exit only when business fundamentals weaken.
